

# CS-141 Introduction to Programming

## Database System Evaluation

Your name: \_\_\_\_\_ The name of the person whose code you are evaluating: \_\_\_\_\_

The content of their database (e.g. Movies): \_\_\_\_\_

1. Were you provided a snapshot of their graphical user interface? \_\_\_\_\_  
(If not, you will need to print it.)
2. Are the following components present?
  - a. Title.....Yes / No
  - b. Save Button.....Yes / No
  - c. Quit Button.....Yes / No
  - d. List all Button.....Yes / No
  - e. Add Button.....Yes / No
  - f. Remove Button.....Yes / No
  - g. List all X (where X is a category, e.g. Director) .....Yes / No
  - h. Other buttons? If so, what are they?
  - i. An output area with scroll bars.....Yes / No
3. Is the interface easy to understand? For example, are the buttons labeled and placed well.
4. Test each button. Does each do what it is supposed to do? If yes, put a check mark next to the button on the snapshot. If not, circle the button on the snapshot and indicate below what is wrong or confusing.
5. Do you have other comments, good or bad?
6. When done, staple this evaluation (first page) to the snapshot (second page) and turn it in.
