Lab 3: Lighting and Shading: Critique/Evaluation (20 pts)

Name of Evaluated Student: _____   *Name of Evaluator:* _____

The assigned word was: _____

1. Were the images rendered as follows:
   a. Production Quality
   b. 640x480 at 144 resolution
2. Does the quality of the lights/shaders give the scene a degree of realism?

3. Image #1: Design issues
   a. Is there a clear primary focal point?
   b. Is there good contrast to help direct the viewer's eye?
   c. Is the image too dark to see on the room projector?

4. Image #1:
   Was the meaning of the assigned word captured in the scene? Consider the following:
   a. The place/location of the scene (objects and environment).

   b. Lighting: quality, type, intensity, color, placement, shadows.

   c. Shading of objects and environment: color, texture, light interaction (ambient, diffuse, specular).

   d. Camera angle and location

5. Image 2:
   a. Does the mood/meaning of image #2 feel very different from image #1?
   b. What elements were changed, and how did their change contribute to the change in mood.
