Modern Geometry
Fall 22
High School Presentation Guidelines

Present a topic related to one of the topics from class, in a presentation suitable for high school students. The default presentation mode is a slideshow (PowerPoint / Beamer / Google slides) although other modes are possible too. The focus of your presentation should be on sharing the ideas from our course in a way that might get the audience excited about learning more.

Grading Rubric

Mathematical Content	
Substantial mathematical ideas presented	/10
Presentation	
Written and visual presentation (quality of slides / handouts / board presentation / graphics)	/10
Oral presentation (quality of exposition, audience engagement)	/10
Communication and accessibility (no unnecessary vocabulary or text, clarity of explanation, understandability)	/10
Extra exciting manipulatives or graphics	/5
Length of presentation (13-15 minutes)	/5
Total	/50
